**S21 Prisoner Counting Chart for 258 days from 23 March 1977 to 31 December 1977**

**Column 1:** Date mentioned on the daily controlling list above the signature (the figures reported in these lists may reflect the situation of the previous day as they might have been established on the following day after lists of prisoners' names had been completed).

**Column 2:** Number of prisoners imprisoned at the start of the day.

**Column 3:** Number of prisoners who entered during the day.

**Column 4:** Number of prisoners who "went out" during the day.

**Column 5:** Number of prisoners at the end of the day.

"/" indicates that the number written in the original document was unclear.

A limited number of numerical discrepancies exist throughout the document, such as when the total number of prisoners calculated at the end of the day does not match the number of incoming and outgoing prisoners, and when the number of prisoners at the end of one day differs from the number of prisoners at the beginning of the following day. Numerical discrepancies are most likely caused by calculation errors as well as fluctuations in prisoner population between the end of one day and the beginning of the next. The majority of these discrepancies are minor, involving a difference of less than 10 prisoners, as indicated by '(sic)'. There are seven inconsistencies throughout the charts, as marked by '(sic\*)', where calculations are inconsistent by 10 prisoners or more. Some of the contemporaneous daily lists included two dates. Where there are two dates, both dates have been included in the table and both dates appear in bold.
