To Beloved Com 870

[I] would like to report a number of issues as follows:

### 1. Defence Situation

As for the external enemies, there has been no change in the last few days. Subsequently, the internal enemies (internal enemies) have not taken any remarkable action. Generally speaking, we can defend from the internal and external enemies.

### 2. Development Situation

[I] would like to report only about the agricultural production regarding building dams and canals throughout the zone. A number of districts have completed; a number of other districts will complete in mid-April. Therefore, currently all the districts all over the zone have assigned and used workforces to build dams, canals and dyke system, and to make fertilizers. In some districts with water, early-seasoned rice fields have been ploughed, raked and sowed; sweet corns, yams, vegetables and crops...etc have also been grown. As for the districts next to the Tonlé Sap lake, [we] have ploughed and sowed continuously.

### 3. Situation of People and People's Livelihood

There has been no change in the situation of people. As for people's livelihood, food has been settled; clothing is enough; there is some shortage of medicine; [we] have continuously dealt with it by gradually producing more medicine. The houses are being gradually renovated, and new houses are being built step by step. As for [people's] sickness, it is getting better this month.

### 4. Matter Relating To Creating Leadership Forces

In Sector 44, the core organization has been extended gradually. At the same time, [we] have also built progressive masses to be responsible in the cooperatives like in offices, ministries, military and worksites. Our ability is being able to build leadership forces in all sections, but as for the daily function, [we] are tempering and testing in the movement, and at the same time, [we] are building [forces] out of the movement continuously.

With happiness and victory
