Regarding this statement, it is requested to examine it
Concretely, then follow up and investigate it also.*

Report

Respectfully report to the Party of a prisoner's statement for its knowledge as follows:

Name: Kim Vanny, aged 22, Chinese; His father's name: Kim Venh, his mother's name: Vann Hin; his birth place: Bakan Village & Commune, Prey Kabbas District, Takeo Province.

When living in Phnom Penh, he was studying at 1st grade, after the liberation he and all the family moved to live in Srae Nonaung Commune, later has joined in the Youth assembly unit.

This person has confessed that: he has really stolen very often, such as coconuts, cassava roots, and climbing up the palm trees at night to steal the palm juice of the Cooperative for drinking, etc, ...

The Chief of the unit has educated him several times, but he still continued to commit the thefts, until the time Angkar assigned him to dig the water canals. Suddenly, one day, he started to get crazy with a person who was holding a hoe, when the latter put full of soil in his basket, by uttering that: These people are all flattered people, for me, I am not as flattered as you are.

All the acts committed above, was his personal idea who used to see everything is dark, who had never been doing hard work when living in Phnom Penh city, and who only got used to having rice already cooked after returning from school.

On 7/3/1977.

Report

Respectfully report to the Party for his knowledge, of a Statement of the prisoner, as follows:

(The rest of the page is illegible.)

00271036

Self-criticism

Name: Nhep Yan, aged 34, spouse's (wife) name: Pho (revolutionary name: Van); his native village was Ang Reang Village, Beung Tranh Commune, Samrong District, Kompong Speu Province.

His place of living and work is in Hospital 22, which produces traditional medicines, under the joined leadership of the contemptible Kâng, the contemptible Saet, and the contemptible Duong.

I beg to relate to the knowledge of the Party about a traitorous plan of the contemptible Kâng, the contemptible Saet, and the contemptible Duong that I have received from them as follows: not to produce sufficient medicines; not to provide the medicines timely for using; and to oppose to the guideline of Angkar.

When upon assigned to do any other works, they told [me] to destroy, so that there will not be any progress, such as when replanting they told [me] to bend up the stump of rice-shoots, and just go on replanting them along with the others, successively, so to avoid any criticism by the Angkar that the medical staff are lazy, and try avoid doing the rice farming works. And he also told that: normally, there is no other country where they ever assign the staff from the ministry of health to do the rice farming work.

Therefore, they advised people to do whatever to oppose to the guide line of the Party in rebuilding and defending the country, in order to prevent it from making any swift progress.

For myself, I personally have not educated any other person yet, but I have just implemented this, such as concerning the producing of traditional medicines, they have advised us not to try to produce in big quantity and all items of medicines that are needed according to the requirement of the Angkar. That means, according to their proposals, we should only think of producing insufficiently to cause the shortages. This would please them very much.

Beside this, concerning the patients, they did not care in providing treatment to them in order to be healed soon, but they have just treated them negligently.

It is to confirm that according to the statement of the contemptible Yan, it is not different from what of the contemptible Hâng, the contemptible (female) Yan and the contemptible (female) Run.

Therefore, I would like the Party to please be informed of the above.

On 12-6-77.

Educational Office of District 105**Report**

Respectfully report to the Party of the Statement of a prisoner as follows:

Name: Yem Pao, aged 38, spouse's (wife's) name: Chim Chuon; his birth place was in Nor Maur Village, Cheang Torng Commune, Tram Kâk District, Takeo Province.

This above contemptible person confesses that: in 1962 he was a detective, then changed from detective career to military. And after that he changed from military to gendarmerie and had a rank as 1st-Lieutenant. There he had control over all the gendarmerie stations in Phnom Penh, and was a person who sought to arrest people to be brought over to Lon Non, in order to force them to join the military.

After 17 April, he moved back to live in his native village up till now.

The activities of this contemptible person was that he was lazy, he does not want do the works, his facial expression is never happy. He has said that since he was grown up he felt dislike doing the rice farming work, but now it is inevitable. So why he does not please with the revolutionary regime, since he used to have a salary for spending happily whenever he wanted, he could eat whatever he wished. It is for this reason that his face always looks sad and never looks happy.

This is all what we got from his statement.

Educational Office of District 105**Report**

Respectfully report to the Party of the Statements of the prisoners as follows:

- 1- Name: Sum Seang, aged 41, spouse's name: Em Phorn, his birth place was in Ang Thnot Village, Ang Tasom Commune, Tram Kâk District, Takeo. This contemptible person was a military with his rank as corporal.
- 2- Name: Sum Seng, aged 38, his spouse named: Yeung Savân, his birth place was in Ang Thnot Village, Ang Tasom Commune, Tram Kâk District, Takeo. This contemptible person was a military with his rank as Chief-corporal, of the unit 619, under commander Sou Chau Em, whose rank was Major.

Both of them are kinsmen, who moved back to live in their native villages after 17 April up to now. The contemptible Seng, was assigned by the Angkar to produce the manure No.1, in the village. One day, a person named Eal Pak, was seen walking to that place where the manure is produced and met with Seng, then they both were sitting together for smoking. Pat has asked to Seng: I heard what sounds like an explosion, is there fighting somewhere? Seng has answered: It is not known where the fighting is. The contemptible Pat then said again that: Why Seng! Why do you not know? Now Prum Sann is recruiting so many in the army, only the students and military are recruited. When he just spoke up to this, many workers who produce the manure suddenly arrived, the contemptible Pat stopped talking. He returned to his place of work after standing at the manure producing place for a while.

According to the statements of both contemptible persons above said: the person who initiated the talk about this issue was the contemptible Eal Pat, because he had been a soldier of the contemptible Eal Pat and the contemptible Pagn.

This is all according to the statement given.
