These three former ranking officers were against the cooperative. They were not happy with labour work. If they were assigned to plough, they did not make the plough touch the ground; and they went around telling people not to work.

According to the confession of these three individuals, the reason they were always upset in the cooperative just because they had always been in the positions of ordering people; and with their titles, they had money and fancy life. They could go anywhere they wished; thus, when they came to live in the cooperative, they always ended up upset because they worked restlessly.

Moreover, these three contemptible persons were ranking officers that shall be collected/brought in.

This is all the three individuals provided.
